

International Fair of New Technologies in Diabetes

ATTD 2024 Tech Fair is the place where start-ups and emerging companies will be displaying cutting-edge technologies and medical devices for diabetes treatment. The Fair gives the spotlight to start-ups, research centers and companies with products in the pipeline to promote their advances and achievements, so they can get feedback and contacts to speed up development and improve their inventions.

Be at the forefront of this constantly evolving discipline.

Grant Application is now closed!

Applications for the ATTD Tech Fair Grant are no longer being accepted. You can still participate in the Tech Fair by booking the Tech Fair package, specially crafted for start-ups. Tap the button below and find out more about it inside the brochure.[VIEW BROCHURE](#)

Highlights

- Gathers researchers from the academic world, key opinion leaders and fellow inventors who are keen to learn about new research and development findings
- Provides a unique platform enabling a rare exchange of views and ideas on emerging technologies
- Links new inventions to potential industrial companies and investors in the field interested in funding further development or commercialization of inventions or products
- Draws the attention of entrepreneurs, venture capital companies and puts inventions, designs and products in the limelight
- Creates opportunities for building networks between international inventors and scientists worldwide

- Maximizes exposure of the innovative products and technologies by way of a global audience
